EXPERIENCE

Software Engineer

Nov. 2021 – Feb. 2024

Tata Consultancy Services

Bangalore

- Engineered a centralized analytics dashboard for real-time data visualization, driving data-informed business decisions that boosted customer satisfaction (CSAT) by 15%.
- Architected a scalable full-stack application leveraging React, PostgreSQL, and Node.js, ensuring zero downtime and seamless processing during 3x concurrent user traffic surges.
- Spearheaded a cross-functional team of developers to migrate a legacy system to a modern, cloud-native platform, resulting in a 20% reduction in overall operational costs.

Full-Stack Developer Intern

Jan. 2021 – Feb. 2021

Coding Club India

Remote

- Developed and integrated a high-impact, real-time testimonial component in React, driving a 40% increase in user engagement and feedback submissions.
- Strengthened backend API infrastructure, successfully reducing average page load latency by 300 milliseconds.
- Implemented an interactive course delivery system to streamline information access, significantly reducing user inquiry response times by 30%.

PROJECTS

Payments App | *Next, typescript, Node.js, Postgres, Prisma*

Oct. 2024 – Dec. 2024

- Deployed a payments app with features to add money and perform peer-to-peer (P2P) payments through wallet
- Optimized database schemas and API routing mechanisms to ensure seamless processing of tens of thousands of wallet and P2P payments during peak traffic.

Blogging website | *React, typescript, Node.js, Postgres, Hono*

Aug. 2024 – Sept. 2024

- Designed a blogging platform where everyone can explore all blogs, publish and read over 1000's of blogs
- Enforced secure Login and Sign-up features with JWT, ensuring reliable authentication and data security.
- Refined functionality for users to explore the list of most popular blogs

YouTube clone | *React, Typescript, Node.js, Next.js*

June 2024 – July 2024

- Launched a social vlogging platform that empowered creators to upload videos, boosting interaction by 40% in the first month.
- Revamped intuitive video player controls and integrated social sharing features, increasing user interaction by 40% measured by video shares and likes, and boosting overall user activity.
- Delivered 30% faster, intuitive UI, ensuring smooth performance on desktop and mobile

Apparel Recommendation Engine | *Python, Bow, TF-IDF, Word2Vec, NLP*

April 2024 – May 2024

- Crafted a Machine Learning-driven, content-based recommendation system using Natural Language Processing (NLP) techniques like TF-IDF, tackling key user experience challenges with insights from feedback
- Enhanced product recommendations using the Amazon Product Advertising API, boosting conversions by 30%.

CERTIFICATE

Google Associate Cloud Engineer Certification

May 2023 – May 2026

TECHNICAL SKILLS

Languages: C/C++ , JavaScript, Typescript, Python, SQL

Frameworks: React, Node.js, Next.js, Turbo repo, Express, Hono, Tailwind CSS

Libraries: pandas, NumPy, Matplotlib, Express, Zod, Axios, Prisma

AI/Data Science: NLTK, NLP (NLTK, TF-IDF, Word2Vec), Machine Learning Algorithms (Regression, Classification, Clustering)

Databases: Postgresql , MySQL, OracleDB

Cloud, DevOps: Git, Docker, Google Cloud Platform
