

KUMAR CHANDRA SHEO SHANKAR

Full Stack Developer | React.js, Next.js, Node.js, TypeScript | 4+ Years Experience

+91-7384428903 | csshankar97@gmail.com | [Linkedin](#) | [Github](#) | csshankar.in

Summary

Software Development Engineer with 4+ years of experience building end-to-end web applications across React.js, Next.js, Node.js, TypeScript, and Representational State Transfer (REST) APIs, backed by PostgreSQL, MySQL, and Prisma ORM. Led a cloud migration to Google Cloud Platform serving 50,000+ users, trimming infrastructure spend by 20% and accelerating release cycles by 66%. Delivered payment and recommendation systems driving up to 40% % engagement growth and 30% % conversion improvements. Strong in backend architecture, database design, API development, and production-ready delivery.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, C, C++

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Hono, REST APIs

Databases & Data: PostgreSQL, MySQL, Oracle Database, Prisma ORM, Pandas, NumPy, Matplotlib

Tools: Google Cloud Platform (GCP), Docker, Git

Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), Application Programming Interface (API) Design, Database Management Systems (DBMS), TF-IDF, Natural Language Processing (NLP), Word2Vec

Work Experience

Coding Club India

Full Stack Developer

Remote, India

Mar 2024 – Present

- Constructed a real-time testimonial component in React, driving a 40% increase in user engagement and feedback submissions within a 6-week sprint.
- Reduced page load latency by 250 milliseconds through backend API tuning, supporting a user base of 5,000 monthly visitors.
- Established an interactive course delivery platform, improving content accessibility for 2,000+ learners and cutting inquiry response time by 30%.

Tata Consultancy Services

Software Engineer

Bangalore, India

Nov 2021 – Feb 2024

- Engineered a centralized analytics dashboard using React.js and Node.js, cutting reporting turnaround time by 40% and lifted customer satisfaction scores by 15% across 3 business units.
- Architected a full-stack platform on React.js, Node.js, and PostgreSQL, sustaining zero downtime through 3x traffic surges affecting 50,000 concurrent users.
- Migrated a legacy enterprise application to a cloud-native Google Cloud Platform setup, reducing operational costs by 20% and cutting deployment time from 6 hours to 2 hours.
- Optimized PostgreSQL query execution and backend service throughput, trimming average API latency by 300 milliseconds across 12 production endpoints.

PROJECTS

Nexis Pay | Next.js, TypeScript, Node.js, PostgreSQL, Prisma

- Designed PostgreSQL schemas and RESTful API routes supporting 25,000+ peer-to-peer transactions with 99.9% uptime.
- Implemented secure JWT-based authentication and transaction workflows, processing payments for 3,000 active wallet users.
- Delivered a production-ready backend handling peak loads of 500 requests per second without service degradation.

Chronicle | React.js, TypeScript, Node.js, PostgreSQL, Hono

- Developed a publishing platform enabling 1,200+ users to create and manage over 5,000 articles.
- Built a popularity-based ranking algorithm that improved content discovery rates by 35% across the platform.
- Integrated JWT authentication and role-based authorization, securing access for 900 registered accounts.

NexusView | React.js, Next.js, Node.js, TypeScript

- Improved page responsiveness by 30% across desktop and mobile devices through frontend performance tuning affecting 10,000+ sessions.
- Increased user engagement by 40% by introducing enhanced video playback controls and social sharing features for 8,000 users.
- Streamlined video upload and streaming pipelines, cutting average buffer time by 20% for multimedia content delivery.

Apparel Recommendation Engine | Python, NLP, TF-IDF, Word2Vec

- The personalized product recommendations generated used the TF-IDF and Word2Vec models, achieving 30% higher conversion rates for 10,000 product listings.
- The deployment of a Natural Language Processing (NLP) pipeline integrated the Amazon Product Advertising API, improving the recommended relevance for 5,000 users.
- Achieved a 25% increase in recommended precision through feature extraction and cosine similarity analysis for 50,000 apparel items.

EDUCATION

Maulana Abul Kalam Azad University of Technology

Bachelor of Technology, Computer Science and Engineering

2021

CGPA: 8.63

Certifications & Achievements

Certifications: Google Associate Cloud Engineer Certification

- Boosted customer satisfaction by 15% through the development of enterprise analytics platforms at scale.
- Reduced cloud hosting expenses by 20% by leading a migration to native cloud architecture on the Google Cloud Platform.
- Scaled a payment platform handled tens of thousands of transactions monthly while maintaining high system reliability.
